PERSONAL PROFILE

I am a Front End Developer with a track record of being a self-starter who learns new things quickly, with a passion for the end user experience, and an intellectual curiosity to learn new tools and technology. I enjoy solving problems. Figuring out how to best implement a design, fixing bugs that crop up, making front end code work with the back end code - for me, development is all about creative problem solving.

"The key to being a successful programmer is to learn how to learn"

-

Shannon Burnst
